

Services Provided: Finishing, Formwork, Pumping, Shotcrete

DISTINGUISHED PROJECTS

SALESFORCE TOWER

Key Highlights:

- Record-setting largest continuous mat pour in San Francisco - November 2015
- Final core wall poured and topped off the concrete portion of the 1,070 foot office high-rise, making it the tallest building in San Francisco - November 2016
- Over 30 million pounds of rebar fabricated and installed.
- 3-day cycle on floor construction achieved.

6+ million pounds of reinforcing steel, mostly consisting of #18 bars (2.25 inch diameter), woven into the 14-ft. thick mat.

12,000 cubic-yard mat pour produced a foundation that rests on 42 load-bearing elements (LBE's) drilled 265 feet down into bedrock.
