

Services Provided: Pumping, Finishing, Formwork, Reinforcement, ConFoam, Shotcrete

DISTINGUISHED PROJECTS

SANTANA ROW WEST

Key Highlights:

- 8-story 375,000 square foot office building is located in the live-work-play Santana Row development in San Jose.
- Achieved a fast-track schedule while being respectful of neighbors living in close proximity causing work hours to be minimized.
- ConFoam was used to backfill against the below grade cistern walls saving weeks on the schedule.
- The design incorporates some unusual slab cantilevers that will accommodate unique unitized curtain wall and GFRC assemblies.
- Upon completion it is projected that the structure will achieve LEED Gold certification.
