# REBAR FABRICATION

---

---

## QUALITY, SUPERIOR REBAR FOR ANY PROJECT

As one of the top rebar manufacturers in the country, The Conco Companies fabricate and install high-quality, dependable concrete rebar and post-tension cable for Southern and Northern California, Washington, Oregon and Colorado.

Conco's rebar fabrication in-house, single-source process provides our customers:

- **A guarantee to meet or exceed all exacting specifications and that each rebar product is backed by our high standards.**
- **Highly skilled staff that is provided with up-to-date technological training including the use of building information modeling (BIM).**
- **The assurance of a large inventory for timely project completion and advanced field fabrication tools to complete a quality job.**

Conco's precision-engineered reinforcement products are produced at one of our two large, state-of-the-art rebar fabrication facilities. Each facility is outfitted with some of the newest equipment and specialized tools, as well as a highly-trained team that fabricates, assembles, and installs the products.
