# SHOTCRETE

---

---

## ECONOMICAL, HIGH QUALITY SOLUTION

*Shotcrete* is an excellent alternative to traditional cast-in-place walls. Shotcrete is pneumatically placed concrete that almost eliminates the forming process altogether, and thereby greatly reduces labor cost and time. It has the same structural characteristics as traditional cast-in-place walls and a wide range of applications including:

**Shear walls**

**Retaining walls**

**Architectural walls**

Conco operates shotcrete crews in Washington, Northern California, Southern California, Oregon and Colorado. We are specialists at servicing jobsites with extreme operating environments such as chemical plants, gas-fired electrical generators and hydroelectric plants. Our operation consists of a fleet of modern, up-to-date trucks complete with concrete pumps and all the equipment needed to get the job done right, on time and within budget.
